RITCHIE INTRODUCES THE OMNI™ DIGITAL VACUUM GAUGE

*Compact, easy-to-use, and more unique features
than any other unit on the market*

BLOOMINGTON, MN (January 6, 2017) – Ritchie Engineering Company, Inc., the leader in service tools for HVAC&R professionals and manufacturer of YELLOW JACKET® products, announces today the OMNI™ Digital Vacuum Gauge, a compact gauge that is loaded with features for the price.

The OMNI Vacuum Gauge is rugged and built to last. Made with high impact, glass reinforced housing, it survives moisture and accidental drops or attachment to a high pressure line. The easy-to-clean vacuum sensor handles 450 psi positive pressure and reads several units of vacuum (microns, millibar, Torr and Pascal).

Additional features include: an audio and visual signal when the target vacuum level is reached; an electronic paper display for clear visibility – even in direct sunlight; a rich and intuitive user interface - turn it on and its ready to use with default settings; a 45° degree bend for fitting (1/4" or 5/16"); automatic power down and time out; power savings - multiple time-out selections; and, a low battery indicator and automatic power-down when inactive. Adapter fittings are available. This gauge is made in the U.S.A.

About YELLOW JACKET

The YELLOW JACKET brand name is synonymous with the highest quality and most complete line of HVAC/R tools in the industry. The brand's roots go back to 1946 when Ritchie Engineering Company, Inc., a manufacturers' representative organization, became a hose manufacturer. With an emphasis on quality and service, Ritchie Engineering, based in Bloomington, Minn., trademarked the hose as the YELLOW JACKET® Charging Hose in 1950. Since then, the company has been engineering, manufacturing, and continuously improving the YELLOW JACKET hose while adding new products to its portfolio. Today, YELLOW JACKET products are sold worldwide through a network of authorized HVAC&R and automotive wholesalers. For more information, please call (952) 943-1333 or visit our Web site at www.yellowjacket.com.
